

▼ Instructions

With Modify Header Value addon you can add, modify or remove a custom "HTTP request header" for any request on desired URL(s). This addon is very useful if you are an app developer, website designer, or if you want to test a particular header for a request on a website. Modify Header Value (HTTP Headers) allows you to easily change an HTTP request header sent to any web server. For a complete list of HTTP headers, please take a look at the list of [HTTP Header Fields](#) in Wikipedia. To report bugs please visit add-on's [homepage](#) and fill the bug report form.

Sample: A sample Header is shown below. Column (1) shows the header number. Column (2) is where you put the desired URL. Check Column (3), to use DOMAIN instead of the URL. Column (4) applies the Header to all URLs whose Tab (or top-level) URL is the given URL. If you do NOT check column (4), the header will be applied to the exact URL(s) matching the given URL. Column (5) is the Header name. If you check Column (6), the header will be added to the current URL. Likewise, if Column (7) is checked the header, if matched, will be modified with the new value. Column (8) is to remove the given header, if existed, from the given url-request. Column (9) is for the header value. Column (10) is to activate or inactivate the header, the yellow color indicates an active, and the gray color indicates an inactive header (clicking the button will swap the colors). Column (11) is to permanently delete a header item.

Note 1: Use "*" (star) in place of the URL field to apply the given header(s) to all URLs.

Note 2: Once you add a field to the table below, currently there is no option to edit the URL, Name, and Value areas. To do so, please add a new field and remove the old one (the edit option will be added in the next version).

#	URL	DOMAIN	SUB	HEADER NAME	ADD	MODIFY	REMOVE	HEADER VALUE	STAT
1	https://www.example.com/	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	User-Agent	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Mozilla/5.0 (iPhone; CPU iPhone OS 9_2 like Mac OS X) AppleWebKit/601.1 (KHTML, like Gecko) CriOS/47.0.2526.70 Mobile/13C71 Safari/601.1.46	ACTI

► Settings

Headers

Enter a desired value for (URL), (Header Name) and (Header Value), then press Enter or click on the (+) button to add it to the Table.

URL	HEADER NAME	HEADER VALUE
URL (i.e., https://www.google.com/ or *)	Cross-Origin-Opener-Policy	same-origin
